

GripClip™ is part of our clip portfolio, and serves as a sustainable replacement for plastic rings, tops and shrink wraps, offering other merchandising benefits such as high-quality graphics and a comfortable carry experience.

GripClip works on all can diameters and heights and is available in multiple pack configurations. The design is similar to KeelClip™ but doesn't include the center keel, which provides extra savings in board and materials.

Sustainability

- Made from renewable plant-based fiber from sustainable sources
- Easy to recycle after use
- Significantly less board than most other carton options and a reduction in material from our other clip offerings

Operational Efficiency

- All packs arrive as flat blanks, so more packs can be transported per delivery
- GripClip works for all can diameters and heights and in multiple pack configurations
- Can be direct palletized
- Fully integrated with our high-speed machinery solution

Consumer Experience

- Finger holes make the pack easy to carry and transport
- Cans are well protected with the inner clip construction, but can be easily removed once ready to consume
- High-quality graphics achieve impactful branding on-shelf
