

Pressed Board Tray and Bowl Catalogue

EMEA Region

Our broad portfolio of pressed board trays and bowls offers an economical and effective alternative to traditional CPET, PE, and PP trays. Ideal for a range of fresh, frozen and foodservice applications, the trays and bowls are suitable for heating in both a conventional oven and microwave.

Select the profile to meet your needs

With a range of square, rectangular, and round shapes, and with shallow to deep options, our trays and bowls are available in both single and multi-compartment designs.

Achieve perfectly cooked results

The addition of susceptor or aluminium patterned laminate delivers crisping of the food and even heating.

Create eye-catching designs that stand out on the shelf

Interior and exterior print capabilities provide great opportunities for high-impact branding and messaging.

Achieve a significant reduction in plastic to support your packaging goals

Our trays and bowls are manufactured using cartonboard, which is made from renewable plant-based fibre from sustainably managed forests. A plastic reduction of up to 90 percent can be achieved versus a traditional tray, where an internal barrier/sealing polymer is required. Where this is not required, trays can be plastic-free.

Take advantage of a one-stop-shop solution for MAP, VSP, and flow packaging

Our range of coatings and films provide a safe seal and effective barrier to suit the needs of your food application.

- Broad range of profiles
- High-impact graphics
- Plastic-free options
- Range of coatings and films
- One-stop-shop solution

Our pressed board tray and bowl portfolio of solutions includes:

- Foodservice trays
- Rectangular trays
- Bakery, cake & tarts plates
- Modified atmosphere and vacuum skin trays
- Plastic-free trays
- Oval trays
- Square trays
- Plates
- Lids
- Flow packaging

**This tray is in development. Prototype tooling is available and tray samples are available on request.

***Plastic-free trays with same top-out can be sealed on a DUNIFORM machine. We can offer lidding film and peelable solutions from our Flexibles division for this application. These can be used in a microwave or a conventional oven. The trays can be heated in a conventional oven for one hour at 220°C and in a microwave oven.
