Paperboard Cups and Containers

Our broad portfolio of paperboard cups and containers offers deep and shallow options for a broad range of markets and applications.

We manufacture cups and containers for retail products such as ice cream, frozen ready meals, confectionery, and dairy items. We also offer cups and containers for on-the-go use for ice cream, frozen treats, meals, and drinks as well as buckets for foodservice applications.

Our paper cups come in a wide range of shapes and sizes, with or without lids. Tailored barrier options make the cups suitable for dry, greasy, hot, and cold food.

Our broad portfolio enables customers to replace traditional plastic cups and containers with a more sustainable alternative made primarily from renewable raw materials.

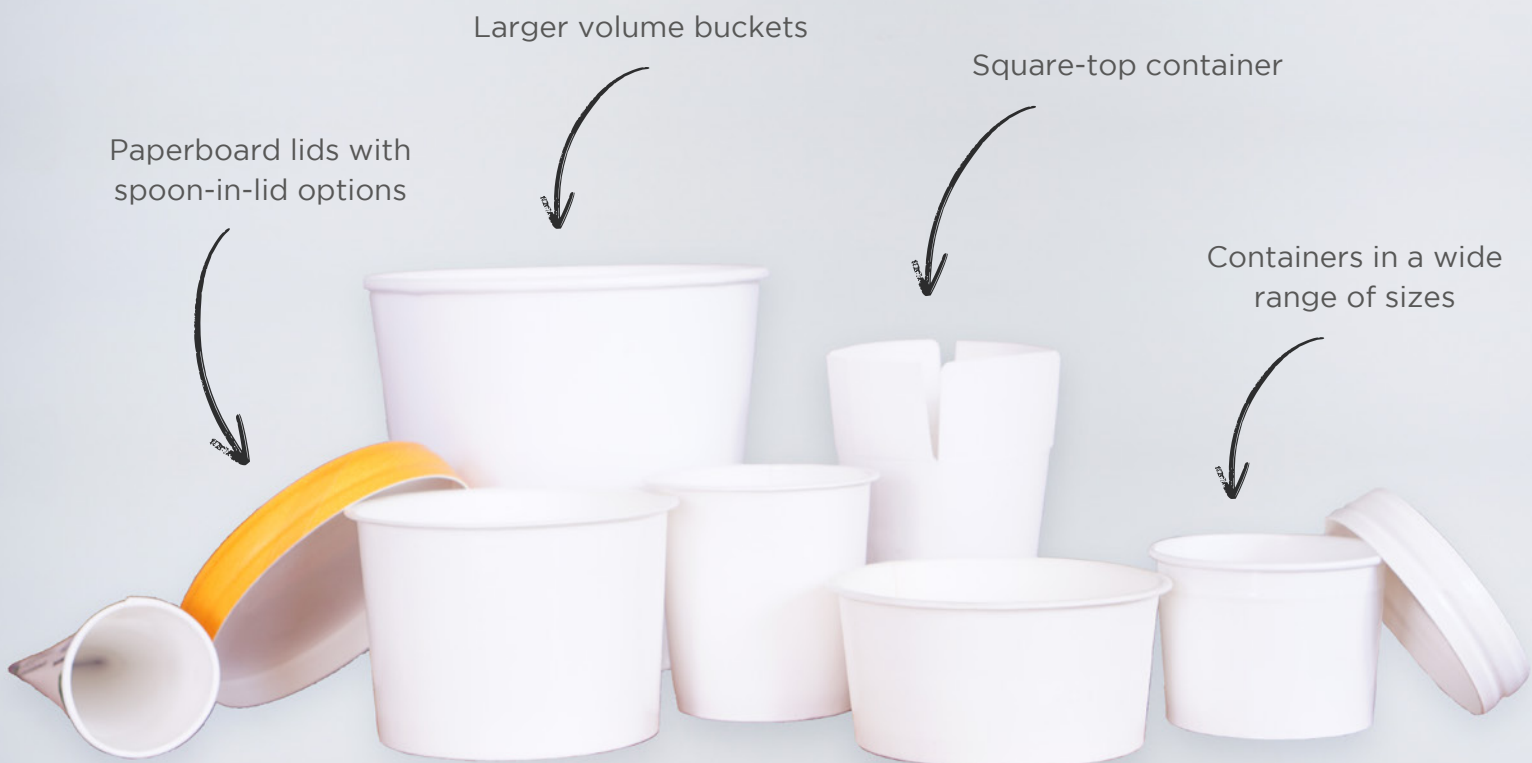

High-quality print and eye-catching graphics deliver impact for your brand on the shelf and on the go.

- A wide number of packs and styles covering round cups, buckets, tubes, and square-top containers.
- Cups and containers are suitable for fast food, barbeque, and reheating or freezing food at home.
- Fill volumes from 80ml (2.8 fl.oz.) to almost 4000ml (130 fl. oz.).
- Can be heated in a microwave or traditional oven.
- Wide temperature range with barriers suitable for -40°C to +200°C.
- Excellent graphics options such as embossing, foil blocking, matt and gloss varnishes.
- All materials are approved for direct food contact.
- Both paperboard and clear plastic lids, as well as integrated square-top closure flaps.

Our extensive portfolio of round paperboard cups and containers are developed primarily for:

- Impulse & retail ice cream
- Frozen food
- Confectionery
- Foodservice
- Takeaway

Microwaveable & Ovenable Food Containers

Our microwaveable and ovenable containers offer an alternative to traditional formats for the rapidly growing frozen and convenience foods sector.

The containers can be filled, frozen, distributed and then reheated in the microwave or oven without the need for extra packaging materials.

Capable of withstanding -40°C to $+200^{\circ}\text{C}$ our containers offer a wide range of possibilities.

Confectionery Packaging

Our quality materials and different print finishes offer many solutions for confectionery. From large format containers to consider for wrapped chocolates or sugar confectionery to containers for pick & mix or popcorn – many options are possible.

As a sustainable high quality alternative to tin or plastic packaging different shapes are possible, as well as our standard round tapered pots and innovative square top packs.

We can help your products stand out from the crowd.

Impulse Ice Cream Packaging

For your single serve container we offer three sizes that are typically used; 80 ml, 100 ml and 125 ml portions. However, the maximum capacity of these containers offers more flexibility as detailed opposite.

To compliment our containers we have machine compatible spoon with lid options including our stackable paper board lid.

We are able to handle multiple designs quickly and affectively with order sizes as small as 25,000 dividable by 5 designs for your flavours where required.

Our superior material and print quality coupled with high quality and cost effective lid options gives you the packaging that your premium brand ice cream deserves.

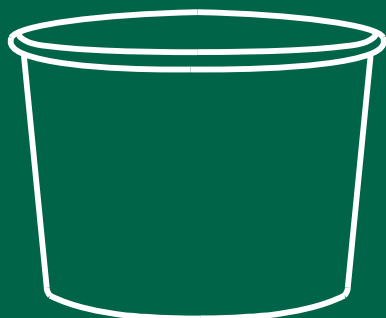

We offer unrivalled flexibility and lead time and fully understand the need to be able to produce and deliver quickly to enable our customers to maximise their sales.

Retail Ice Cream Packaging

Graphic Packaging's production facility in Rotherham specialises in ice cream packaging in size range from 80 ml to 1.2 litre including retail standard round tapered containers for 500 ml, 750 ml and 1 litre as well as 80 ml and 110 ml push-up tubes for water ices and frozen treats.

We also produce a range of square-top one-piece style containers available in sizes from 130 ml to 1.2 litre.

Our use of high quality materials and graphics will give your brand the excellent shelf appeal and the promotion it deserves. Our production is geared to be reactive and flexible, handling any volume, large or small with the option of ordering multiple flavours across the print run.

Buckets Ideal for Foodservice and More

Graphic Packaging's Winsford, UK manufacturing facility specialises in larger volume buckets for foodservice, with 54oz, 85oz, and 130oz sizes available.

The buckets, ideal for applications like fried chicken and popcorn, provide excellent stability and grease resistance. Negative concerns around the use of PE in single-use packaging, as covered by the Single-Use Plastic Directive (SUPD), are overcome by our buckets as they are made from paperboard without PE-coating while avoiding grease stains and oil pooling at the base of the bucket. The bucket is PE-free and free of intentionally added PFAS.

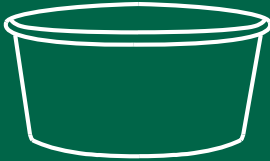

Our buckets are not limited to foodservice applications, they are also a great alternative to traditional tin cans and plastic containers for confectionery and more.
