## **Sustainable Forestry Policy Graphic Packaging International, LLC.**

Graphic Packaging International, LLC (GPI) is committed to continually achieve certification to the Sustainable Forestry Initiative® (SFI®) Chain of Custody and Certified Fiber Sourcing requirements, the Program for the Endorsement of Forest Certification™ (PEFC™) Chain of Custody Standard and Logo Usage Rules and the Forest Stewardship Council® Chain of Custody and Trademark Use Standards.

GPI is committed to sourcing wood and paperboard material from certified chain of custody and non-controversial sources. GPI employs environmentally, socially and economically sustainable practices to meet the needs of the present without compromising the ability of future generations to meet their needs. This is accomplished by practicing and promoting a resource and conservation stewardship ethic.

GPI's Sustainability Policy is to promote the principles of sustainable development, recycling and biodegradability. GPI has set an overall goal to increase the amount of recycled content in its printed packaging and reclaiming all waste material from its production processes to further reduce the amount of wastepaper entering the waste stream.

GPI strives to increase the degradability of its printed packaging products to ensure that non-recycled components are recoverable, bio-degradable and/or compostable.

To help implement and achieve the above sustainability, recycling and biodegradable objectives, GPI has developed and adopted appropriate programs and documented procedures to guide its paperboard procurement, production of printed packaging products and associated sustainable forestry claims and labels.

GPI is also committed to annually review the effectiveness of its sustainability policy, chain of custody and responsible fiber sourcing programs to continually improve its management systems and environmental performance.

Mr. Andrew Johnson  
VP, Government Affairs and Sustainability  
Graphic Packaging International, LLC.
