

# MicroFlex-Q™ Handheld Wrap

The MicroFlex-Q™ Handheld Wrap delivers consumer-friendly features with high impact graphics and superior cook performance. It is ideal for snacks, appetizers, sandwiches and other grab-n-go food products.

## PRODUCT DESCRIPTION

**MicroFlex-Q™** is a flexible susceptor packaging film that browns and crisps a variety of food products in an innovative primary retail packaging format. The patterned susceptor lamination focuses microwave heating right where it's needed to deliver maximum cooking impact.

A range of paper offerings provide moisture and grease resistance with an exceptional print surface, allowing for high impact graphics and up to 8-color flexographic printing. Added benefits include a number of easy to open and self-venting features, providing superior convenience for consumers.
