

# Quilt Wave™

## PRODUCT DESCRIPTION

**Quilt Wave™** is a flexible active microwave package designed to conform to irregularly shaped food products. It can be used as patch material in cartons or trays, and is heat-sealable as rollstock for VFFS/HFFS applications.

Quilt Wave™ has been engineered with cells, or “quilts”, which expand when exposed to microwave energy and provide intimate contact with food, driving away moisture and creating maximum browning and crisping. Quilt Wave™ provides portability, superior browning and crisping, as well as elevation off the microwave oven floor.

## SPECIFICATIONS

<b>Structure</b>	48ga PET/Ink/Adhesive/35lb Paper/48ga Heat Sealable PET
<b>Heat Sealable</b>	100 pouches/min @ 450° F
<b>Dual Ovenable</b>	Yes
<b>Regulatory Compliance</b>	FDA, CFIA, and EU compliant for reconstituting frozen and chilled foods in microwave and conventional ovens
<b>Printing Possibilities</b>	6 color flexographic
