

EnviroClip™ is a can clip packaging solution that uses the least amount of material as an alternative to plastic rings and shrink film packaging.

Free of glue and plastic laminations, EnviroClip comprises a single ply of paperboard.

The ideal solution for standard 66mm diameter cans.

The proprietary overhead clipping system delivers consistent application of the EnviroClip ring to the cans and helps to ensure pack quality and performance.

SUSTAINABILITY

- 100% paperboard solution; no glue or plastic laminations
- Made from renewable fiber from sustainably managed forests
- Easy to recycle after use
- Significantly less paperboard than most other carton options

OPERATIONAL EFFICIENCY

- Machinery has a small footprint, and can run at a range of speeds, from manual application to high-speed automation
- Machinery can be incorporated into, or closely coupled to, other packaging formats to create flexible systems for all can types and pack formats
- Product-pitched machine provides maximum efficiency and speed capability
- EnviroClip provides support and protection of standard cans by holding tightly to the rim of the can with our proprietary clipping system

CONSUMER EXPERIENCE

- Finger holes make package easy to carry and handle
- Cans are secured but can be easily removed once ready to consume
- Space for high impact brand and sustainability messaging
