

Sustainable, Fiber-Based Multipack Packaging for Canned Beverages

Our range of sustainable, recyclable, fiber-based packaging solutions for canned beverages includes clip, wrap and fully enclosed options to deliver the right amount of coverage to protect and secure your product through the supply chain while maintaining visibility and offering outstanding branding opportunities.

Removes the need for both plastic rings and shrink wrap

Offers premiumization through high-impact branding, shape, embossing, and windows

Recyclable packs made from renewable plant-based fiber from sustainable sources

Convenience is offered via finger holes, handles, opening features and dispensing options

Fully integrated machinery solutions

Sustainable, Fiber-Based Multipack Packaging for Canned Beverages

Clip-Style Multipacks

- Potential for configurations from 1x2 to 2x6 (can diameter and profile dependant)
- Offers a clear advertising panel for brand graphics and information while showing the primary container
- Uses the least amount of paper of our can multipack solutions
- Can tops being covered means packs can be shipped without tray film, an important factor when looking at total sustainability impact

Wrap Multipacks

- Suitable for two to ten cans (can diameter and profile dependant)
- Runs on our proven Marksman™ machinery range
- Large branding area, great package integrity enabling direct palletisation without trays if required
- Finger holes and handles can be integrated into the pack for customer convenience

Fully Enclosed Multipacks

- Suitable for four to 36 cans
- Largest branding area
- Finger holes and handles can be integrated into the pack for customer convenience
- Multiple opening features and shelf-ready dispensing options possible
- Runs on our proven QuikFlex™ machinery range
