

Fiber-based flexible barrier packaging designed for dry food applications

Fibrecode™ NPB

Fibrecode NPB is recyclable flex packaging ideal for dry food applications that require a good oxygen barrier. Featuring a natural kraft paper look, the product is sold in roll stock and is ideal for all form-fill, high-speed and seal applications (FFS), offering superior performance and sealing capabilities over other commercially available options.

SUSTAINABILITY

- Recyclable standard equivalent to Old Corrugated Containers (OCC) verified by laboratory testing at Western Michigan University
- PFAS free

PACKAGE PERFORMANCE

- Suitable for form, fill and seal (FFS) applications
- Strong, fast, and durable sealing
- Available with multi-color registered printing
- Oxygen and moisture barrier
- FDA compliant
- Form and fill applications or bag-in-box

CONSUMER EXPERIENCE

- Natural look and branding
- Easy to open and close, no special notching required
- Easier to recycle, higher recycling and recovery rates than plastic alternatives
